

Website Maintenance for Wordpress Sites

Internet trends and technologies are constantly evolving and your business is growing. Our website maintenance plans ensure your site evolves with the changing demands. Website maintenance is key to the ongoing success of your website.

Top 5 Reasons To Want Basic Maintenance

1. We know your site, when an update could affect it negatively, and what to do in that instance.
2. Hackers have a harder time breaking in when code is kept current –and hacking cleanup can be expensive.
3. You are saved unexpected expenses when you want to make a minor change and find we have to update your software before we can take care of your needs.
4. If your site is not working properly on all browsers, you'll lose customers and weaken your reputation.
5. Search engines favor current sites.

What's included

1. We quietly and regularly upgrade your site's software and its associated scripts and plug-ins as updates become available –and after we've vetted the value of the upgrade against your site's needs.
2. DAILY backups of your site.
3. IF an update "breaks" your site, we fix it at NO ADDITIONAL CHARGE.
4. IF your site is hacked, cleanup is at NO ADDITIONAL CHARGE.
